The Foremost

EASTER Style Exhibit of Fashionable Apparel

—The rush for Easter garments will be on Monday. We are ready. Ready in the fullest meaning of the term is this foremost garment department with almost unlimited selection range of bright new spring merchandise. In the assemblage of Easter wearables arranged for the choosing of particular women, the cleverest ideas of foremost designers are shown. Women who will choose their Easter suit, coat, dress or hat this week, cannot do better than do so here. The largest stock, the most authentic styles and the best values are here, at prices that come within the range of every one. Our buying affiliations enable us to confine to the big store, the product of a large number of the most successful and most sought manufacturers. (This is especially true with men's wear). The fruit of this kind of buying is assembled now for your inspection.

It's time to think of your EASTER SUIT

—Our women's suit section is brimful of the newest spring styles, whether your needs be for a suit that is moderate in price or one of the very finest quality, we are equally ready to meet them. Assortments are at their best now. Every approved fabric and color is represented and prices are attractively moderate, ranging from \$12.50 up to \$50.

EASTER GLOVES

Kayser Silk Gloves

—They wear better than any silk glove made, yet they cost no more than the ordinary kind.—The assurance of absolute satisfaction is worth the pains of insisting on "Kayser" silk gloves. Stock complete in all lengths and wanted colors as well as many novelties.

Fownes Kid Gloves

—Fownes gloves for Easter—gloves for all time—certainly, but the Easter assortments are particularly interesting. All the new style touches, military models, etc., are here in fascinating variety. There is no substitute for Fownes, any more than there is a substitute for good manners or good taste.

INCREASED ACTIVITY IN TOMBSTONE

(Continued From Page One.)
(Continued From Page 1)

few weeks a force of twenty to thirty men will be at work there taking out ore. The water pipe line to the mine has been overhauled and put in condition and the machinery overhauled and tested and is now ready to be started. The company has a force of surveyors at work here this week making some preliminary surveys on a number of claims that they intend to make application for a United States patent. They have some hundred claims that they are doing annual assessment work on and the majority of these will now be patented so that it will not be necessary to continue the doing of the annual assessment work. One of the most promising discov-

eries that has been made in the property of the company recently was the uncovering in the Tranquility, of a body of wolframite ore. This is the first discovery of the kind to be made in the district although it has been claimed by many that traces of that class of ore have been found in a number of other places in the district, especially in the granite just below town. The company is very reticent about giving out any information as to what the extent of the discovery is but sufficient information has been obtained to warrant the assertion that the find promises to be a valuable one. So far several sacks of the value ore have been taken out and stored away while development work is being pushed on the find.

The company has had men at work on a number of other properties fixing up the shafts and erecting galleys frames and making other improvement so that work can be started on them at once. The company now is working more properties than the old Tomb-

stone Consolidated company worked and is making most excellent progress. In several places good bodies of high grade silver ore have been opened up but no effort is being made to ship. It has been blocked out and left. The management is greatly encouraged over the development work that has been completed recently and that further improvements are to be made is evident and that the number of men on the payroll is to be greatly increased is also assured.

Other Properties.

During the past week J. A. Rockefeller has been busy at work making surveys of a number of claims for patent for parties outside of the Bunker Hill Company in the vicinity of the State of Maine property.

Several parties have been in the district during the past few weeks looking over claims with a view of taking a bond and lease on them and in a number of instances the papers are now being drawn up for signature. George Bravin and others, who have

a lease on the McCargo property near the Oregon, have opened up a good body of ore and are now erecting a platform preparatory to shipment.

Parties are at present trying to obtain a lease from the eastern owners on the Lucknow property that lies in the vicinity of the Oregon and Escondido claims.

The Union claim that formerly belonged to the Tom Loudon estate was sold last week to the Bunker Hill Company for \$1000. The sale was made by Guy C. Welsh, as administrator. The claim is in the vicinity of the State of Maine about three miles south west of town.

Spring.

the most delightful season of the year, but this cannot be said of the rheumatic. The cold and damp weather brings on rheumatic pains which are anything but pleasant. They can be relieved, however, by applying Chamberlain's Liniment. Obtainable everywhere. (Advertisement.)

C & A OFFICIAL FORECASTS FUTURE

(Continued From Page One.)
would say that the situation would be without danger during the readjustment period. There is no present indication, however, that those industries in the United States which utilize copper will increase their commitments materially yet copper producers must expect to sell their output to domestic consumers largely during the period of readjustment. Not until later will the foreign buyers resume activities. When the foreign market opens, however, copper again will resume a prominent place in the industrial world.
There is this to be said: that profits from the war market, which continue to pile up, are establishing the copper companies in such an unshake-

able position that they will be able to tide over the readjustment period without material curtailment in dividends, and be splendidly prepared to enter into the new industrial era."

Mr. Campbell was asked concerning a report that the stock of Calumet & Arizona will be listed on the New York exchange in the early future. He said this matter was one which rested largely with the stockholders of the company. He has received requests already to take such action but the number of requests has not been sufficient to warrant decisive measures. The listing of C. & A. in New York would entail an expense of approximately \$10,000, incurred for the expenses of an expert to examine and report on the properties of the company; for continued registration of the stock transfers in New York, etc. Mr. Campbell inferred that the subject of New York listing would have to be seriously considered if a convincing number of stockholders expressed to the company their desire

that such action be taken. Mr. Campbell and Mrs. Campbell, who has accompanied him on an extended visit to the west, departed this morning for their home in Calumet, Michigan.

Why Constipation Injures.

The bowels are the natural sewerage system of the body. When they become obstructed by constipation a part of the poisonous matter which they should carry off is absorbed into the system, making you feel dull and stupid, and interfering with the digestion and assimilation of food. This condition is quickly relieved by Chamberlain's Tablets. Obtainable everywhere. (Advertisement.)

CHICHESTER'S PILLS
THE DIAMOND BRAND.
